

Pre-Examination Case History Review Is Available

Attention all College of Integrative Medicine Students

Pre Examination Case History Review Is Available

Let our team of experts help prepare you for the CIM Final Examination and other board examinations that require case history presentation. All CIM students and other board eligible candidates have the option to have (1) case history critiqued prior to sitting for board examinations that require case history presentation. Candidates will receive a compliant case history format to follow and all submissions are reviewed and critiqued by a physician who is experienced in teaching how to present a case history. A written critique and opportunity to ask questions about the review will be afforded to all candidates via email. (Please be advised that a favorable case history critique does not ensure a passing score all board examinations.) Critique fee per case history: \$50
